

Personal Income by States and Regions in 1963

Analysis of Employment Changes by County

The Regional Economics Division of the Office of Business Economics has completed a statistical analysis of certain factors underlying the employment growth of 3,102 local areas (mostly counties) in the United States for the period 1940 to 1960. These analytical materials will be published within a few months. Meanwhile, because of the large number of requests which are being made for them, OBE is making the machine output available on a limited basis for immediate inspection. The tabulations may be examined in the Regional Economics Division of the Office of Business Economics, U.S. Department of Commerce, Washington, D.C.

THIS annual report presents OBE's detailed estimates of personal income in the various States and regions in 1963. Preliminary figures, together with a brief review of major developments last year, were published in the April issue of the *SURVEY*. That issue also carried a comprehensive review of geographic income changes since World War II. The 1963 estimates in that report were based on preliminary and incomplete source data and were presented in summary form with only total and per capita income shown for each State.

The 1963 income data in the following pages are revisions of the earlier aggregates, but more importantly, they include detailed breakdowns of the totals by industrial source and type of payment. Figures for 1961 and 1962 have also been revised, although the revisions are minor. They reflect the considerable amount of additional data which have become available since the estimates were first prepared, as well as adjustment to the revised national totals published in last month's *SURVEY*.

Table 1 shows total personal income by States from 1954 through 1963. Table 2 presents annual estimates of per capita income from 1950 forward.

Comparable figures for earlier years back to 1929 may be found in "Personal Income by States Since 1929," a 1953 supplement to the *SURVEY*, which is available in libraries and which may still be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, or from the nearest Department of Commerce field office.

Disposable personal income

Table 3 contains estimates of total and per capita disposable income for selected years from 1929 through 1963. Such estimates for all years have not been made mainly because of data limitations. In this connection, however, it may be noted that the regional distributions of disposable income and personal income in any given year are quite similar, and that long-run geographic shifts in the two measures are much the same.

Tables 4-62a present a breakdown of personal income in each State and region by major source for the period 1961-63. This detail includes wage and salary disbursements classified into about 25 separate industries, proprietors' income subdivided into farm and nonfarm components, and totals for each of the other main types of personal income. An industrial breakdown of

nonfarm proprietors' income is not provided in view of its questionable validity for separate analytical use, particularly with regard to year-to-year changes. Comparable data for 1929 through 1953 are contained in the Personal Income supplement noted above. Figures for 1954-56 may be found in the August 1959 issue of the *SURVEY*; for 1957, in the August 1960 *SURVEY*; for 1958, in the August 1961 *SURVEY*; for 1959, in the August 1962 *SURVEY*; and for 1960, in the August 1963 issue.

Income by industrial origin

Frequent requests are received for breakdowns of State personal income by industrial source. Available statistical data do not permit a complete allocation of total income to the industry of origin in each State. However, in addition to the considerable detail in tables 4-62a, some additional classifications of personal income by industrial origin have been prepared.

Thus, table 63 shows the amount of personal income received in each State directly from farming, government (separately for Federal and State and local), and private nonfarm pursuits. Separate focus on these three sectors

has been found essential for analysis of both the composition and movement of total personal income by States and regions.

Table 70 provides an industrial distribution for each State of a large seg-

ment of total personal income. This consists of the combined total of wage and salary disbursements, other labor income, and proprietors' income. These three flows together account for about four-fifths of the Nation's personal in-

come and present a broad view of the industrial composition of each State's economy. Also, they represent the most comprehensive measure of current dollar production that has been constructed on a geographic basis.

Table 1.—Total Personal Income, by States and Regions, 1954-63

Table 2.—Per Capita Personal Income, by States and Regions, 1950-63

Tables 63-70 of the Personal Income supplement present comparable data on the industrial breakdown of personal income for selected years since 1929. Each August issue of the Survey has carried these two tables in terms of the

current year. Because of data revisions, the industrial breakdowns by State after 1950, shown in tables 63 and 70 of both the 1956 Personal Income supplement and August issues of the Survey from 1957 through 1963, are

not strictly comparable with the correspondingly numbered tables in this issue. Comparable figures have been prepared for 1957 to serve as an intermediate benchmark between 1950 and 1963. They are available on request.

Table 3.—Total and Per Capita Disposable Personal Income, by States and Regions, Selected Years 1929-63

	Total (millions of dollars)										Per capita (dollars)

Footnotes to Table 63:

1. Consists of net income of farm proprietors, farm wages, and farm "other" labor income, less personal contributions under the OASI program.
 2. Consists of income disbursed directly to persons by the Federal and State and local governments. Comprises wages and salaries (net of employer contributions for Social Insurance), other labor income, interest and transfer payments.
 3. Excludes total personal income less farm income and government income disbursements.
- Note.—U.S. totals include Alaska and Hawaii.

Footnotes to Table 70:

1. Consists of wage and salary disbursements, other labor income, and proprietor income.
 2. Does not include earnings of military personnel.
 3. Less than \$300,000.
- NOTE.—U.S. totals include Alaska and Hawaii.
